Please amend Claim 6 as follows:

Claim 6 (amended) A method of making a delivery *or pickup* of a good to a customer using a system for facilitating a delivery and pickup of goods comprising:

a plurality of locker modules, each of said locker modules having a plurality of locker units, a locker controller, a user interfacing device, a user-identifying device, and a remote receiving and transmitting device;

a system controller independent from the plurality of locker modules, the system controller having an application server, a database server, and a remote receiving and transmitting device for communicating with said remote receiving and transmitting device of said locker modules; wherein said system controller is adapted to facilitate leasing of said locker units by registered parties for delivery or pickup of a good, said registered parties including a customer, a vendor and a delivery agent;

a customer's PC terminal communicably connected to said system controller;

a vendor's PC terminal communicably connected to said system controller; and

a delivery agent's PC terminal communicably connected to said system controller,

said method comprising:

receiving, by said system controller, a request for use of a locker unit for said delivery or said pickup of said good;

reserving, by said system controller, said locker unit in response to said receiving step; and

notifying, by said system controller, said customer after said delivery of said good or of said locker unit for drop off of said good for said pickup.
